Design/ Build

Bellingham Marine France build a metal frame dock Unideck® for the historic boat Belem built in 1896.

Belem, a French historical three-mast boat, is the last of the great French sailing boats of the 19th century still sailing.

The Belem Foundation decided in 1980 that it would return to sea. The boat would be a civilian training vessel open to the general public. It is the oldest sailing ship in the world to host offshore or offshore navigation. Bellingham Marine France made the renovation which included a 24ml of metal frame dock system Unideck®.
