Relevance:

Fix metal frame docks Unideck®

Timeline:

2016

Quality Control:

BMI ISO QA Manuel, CMFerrer

Project Delivery:

Design/ Build

Construcciones Metálicas Ferrer, has designed and built 96ml of fix metal frame docks Unideck® with 8 docks of 12m by 1,2m wide and a gangway. The old facility had only 0,9m wide so this actualization helps so much the people who are using the installation. The *Comunidad of Propietarios* has updated the marina, increasing its value and revenues.

The renewal of the marina was completed by installing 14 pedestals with 4 sockets and 2 water tap each one, from Rollins Marine & Caravan Services. We are able to offer any kind of pedestal from the whole range of Rollins Marine products.
